Method calling at Run time polymorphism

```
Int x
Display(){}
Show(){}
```
ClassA

```
Int Z

Method1()
Override show(){}
```
ClassE

```
Int Z

Method1()
Override show(){}
```
ClassC

```
Int Z

Method1()
Override show(){}
```
ClassD
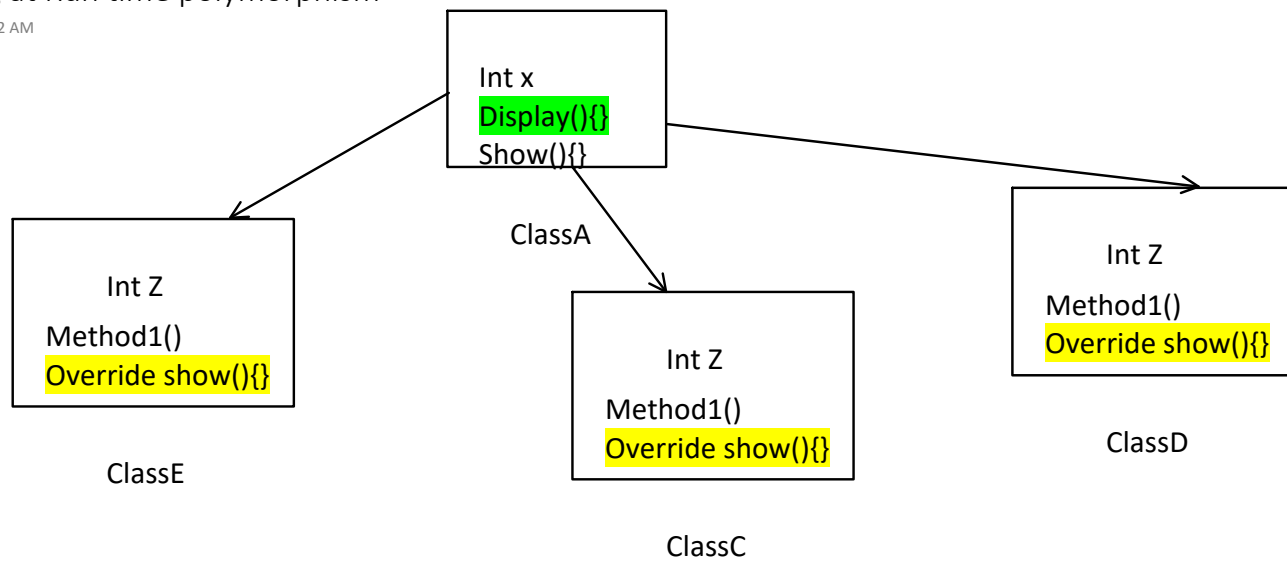

ClassA obj1=new classD();
Obj1.display();// valid
Obj1.show();//child show /valid
Obj1.method1();//invalid

Multiple Inheritance Diagram

```
Int x
Display()
```

```
Int y
Display()
```

ClassA   ClassB

```
Int Z

Method1()
```

ClassC

Class classC:parentA,parentB
{
}
